700 ~ 1000 Kgs. (per day)

Modern Garment Accessories Testing Laboratory

To ensure the highest standards of quality, durability, and customer satisfaction, our factory is equipped with modern testing and inspection equipment. Every production batch of plastic and paper hangers undergoes rigorous testing procedures to verify compliance with customer specifications and quality requirements. Testing Equipment & Facilities

Digital Weight Scale Machine :

The Digital Weight Scale Machine is used to accurately measure the weight of raw materials, semi-finished products, and finished hangers. Precise weight control helps maintain product consistency and ensures compliance with customer requirements.

Light Box :

The Light Box is used for color assessment and visual inspection under standardized lighting conditions. This equipment helps ensure color consistency and detect any visual defects before shipment.

WHL-25A Constant Temperature Drying Oven :

The Constant Temperature Drying Oven is used to maintain controlled temperature conditions for testing and conditioning materials. It helps evaluate product stability and material performance under specific temperature environments.

AATCC Perspiration Tester :

The AATCC Perspiration Tester is used to evaluate color fastness and material performance under perspiration conditions according to international testing standards. This equipment ensures product quality and durability in practical usage environments.

Rubbing Dry & Wet Test Machine :

The Rubbing Dry & Wet Test Machine is used to determine color fastness against rubbing under both dry and wet conditions. This test ensures that printed logos, coatings, and colored materials maintain their appearance during handling and use.
